

**IN THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1.     *(Currently Amended)* An information storage medium comprising a disc-like shape substrate having a center hole and a peripheral side, said medium comprising:  
    a data area formed on the substrate and configured to store or to record given information ~~and being formed on the substrate~~;  
    a clamp area located outside the center hole and inside the data area; and  
    at least one notch or groove provided on at least one portion of the peripheral side.  
    ~~one or more notches or grooves provided on at least one of:~~  
        ~~a portion of the peripheral side,~~  
        ~~another portion of the center hole, and~~  
        ~~still another portion around the clamp area.~~
2.     *(Original)*     The medium of claim 1, wherein said medium is an optical disc formed of a single disc substrate.
3.     *(Original)*     The medium of claim 1, wherein said medium is an optical disc formed of double disc substrates being adhered together with a given adhesive.
4.     *(Currently Amended)* The medium of claim 1, wherein said at least one notch or groove is formed at ~~a corner edge of the peripheral side~~ an edge of the peripheral side to enable tactual recognition of the notch or groove.
5. – 9. *(Withdrawn).*
10.    *(Currently Amended)* The medium of claim 1, wherein said medium comprises a front surface and a rear surface, and wherein said data area is provided on the front surface.

11. (*Currently Amended*) The medium of claim 10, wherein said data area is also provided on the rear surface.

12. (*Original*) The medium of claim 10, wherein a label area is provided on the rear surface.

13. (*Withdrawn*).

14. (*Currently Amended*) The medium of claim 1, wherein said ~~one or more notches or grooves is/are~~ at least one notch or groove is configured to indicate a type, or a kind, or a medium side, or contents of the medium.

15. – 20. (*Withdrawn*).

21. (*New*) The medium of claim 4, wherein said at least one notch or groove is configured to indicate a type, or a kind, or a medium side, or contents of the medium.

22. (*New*) The medium of claim 1, wherein said peripheral side is provided with a plurality of portions each having said at least one notch or groove.

23. (*New*) The medium of claim 4, wherein said peripheral side is provided with a plurality of portions each having said at least one notch or groove.
